

Adventist Health Selects PHS Technologies' DoseMonitor as Its Radiation Dose Monitoring Solution of Choice

SCOTTSDALE, Ariz./EWorldWire/Nov. 24, 2017 --- PHS Technologies Group LLC, a division of PACSHealth, LLC and developer of innovative software that records and analyzes ionizing radiation data from medical imaging procedures, today announced that DoseMonitor(R) has been selected as the dose monitoring software vendor of choice by Adventist Health. DoseMonitor will be rolled out at all Adventist's facilities that perform diagnostic imaging.

"We are pleased that Adventist Health is implementing DoseMonitor enterprise-wide to monitor, report, and manage radiation dose in its clinical environments. Adventist Health is on the forefront of medical imaging technology and shows a true commitment to patients," said Mike Battin, chief operating officer of PACSHealth, LLC.

DoseMonitor is a browser-based software application that automates dose data collection and reporting. It fully integrates into an RIS, EMR, and the American College of Radiology's Dose Index Registry, helping to eliminate time-consuming manual steps and reducing input errors. Facilities can accurately depict historical exposure and compare, aggregate, and interpret data from ionizing radiation sources for an individual patient, exam, or between diagnostic modalities in multiple facilities.

About PHS Technologies Group LLC

PHS Technologies Group, LLC is a division of PACSHealth, LLC, a medical software development company based in Scottsdale, Ariz., that develops software systems for medical imaging technology. PHS Technologies Group is committed to helping the medical community reduce patient exposure to ionizing radiation through advanced solutions that enable hospitals to manage patient radiation exposure and comply with regulatory requirements and industry guidelines while increasing efficiency and reducing cost. For more information about DoseMonitor, visit <https://www.dosemonitor.com>. PACSHealth, LLC's solutions are installed at over 1,200 hospitals worldwide.

About Adventist Health

Adventist Health is a faith-based, nonprofit integrated health system serving more than 75 communities on the West Coast and Hawaii. The organization's team of 33,300 includes more than 24,600 employees; 5,000 medical staff physicians; and 3,700 volunteers working together in pursuit of one mission: living God's love by inspiring health, wholeness and hope. Founded on Seventh-day Adventist heritage and values, Adventist Health provides care in 19 hospitals, more than 280 clinics - hospital-based, rural health and physician clinics, 13 home care agencies, seven hospice agencies and four joint-venture retirement centers. For more information about Adventist Health, visit <https://www.adventisthealth.org>.
